(72)Inventor : INADATE TOSHIO

(54) INFORMATION MANAGEMENT DEVICE, METHOD AND INFORMATION MANAGEMENT SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To smoothly perform transaction in a network.

SOLUTION: When a user's terminal 1 accesses the home page of a member store and orders merchandise, order data are transmitted and stored to a terminal 12 of the member store. The terminal 12 of the member store appropriately accesses a shopping proxy server 13 and receives the supply of an image for slip generation. When a sales slip is generated, the server 13 stores it and sends a confirmation mail that confirms an order to the user's terminal 1. The confirmation mail includes a URL(uniform resource locator) that confirms order information. When the user's terminal 1 accesses the URL, the server 13 transmits the order information to the user's terminal.

LEGAL STATUS

[Date of request for examination] 03.04.2000

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3214391

[Date of registration] 27.07.2001

[Number of appeal against examiner's decision of rejection]

{Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
